

**TO WHOMEVER IT MAY CONCERN**

Calolziocorte (LC, Italy), 14/1/2008

Our Company has been working with Indsys Computers (P) Ltd for the purpose of developing a library of 3d models of furniture, under contract awarded by a prestigious Italian manufacturer. Such models are then distributed by our customer to architects and rendering professionals, to be used as building blocks for presentations of interior design projects.

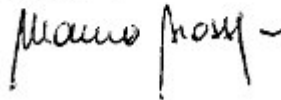

Overall our experience with Indsys Computers (P) Ltd has been very positive. Indsys has proved to be careful executor and a deliverer. One quality we particularly appreciated was the flexibility to accept input of different kinds and the integration of the customer's feedback into the final models.

Before collaborating with Indsys we had experience of working on a batch of same project with another service provider which has turned out to be a disappointment. Indeed, Indsys has helped us to make up for mistakes left over in that part of the project and recover sunk cost.

We want to count on you again for future projects. We can only recommend Indsys as a positive and reliable partner.

Sincerely,

 **OUTSOURCING
